Detailed Action

Response to Amendment

1. Applicant's arguments filed on 9/14/2005 regarding claims 15-21 have been fully considered. Claims 1-14 have been canceled by applicant.
2. Acknowledgement is made of the amended claim 21 with respect to the claim objection cited in the previous Office Action. The correction is acceptable and the claim objection to claim 21 has been withdrawn.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The present application relates to adjusting channel power in an optical wavelength division multiplex transmission system by performing a method of providing equal signal power levels and equal signal-to-noise SNR ratios at the receiving end, including the unique steps of: "calculating a transmission-end correction factor from a ratio of a previous transmission-end mean level value to a transmission-end mean value from a new transmitted signal power level; and changing the individual signal power levels of transmitted signals using the transmission-end correction factor which is equal for all transmitted signals."

The closest prior art, Purnadi et al. (US Patent 6,708,031), discloses an optical frequency division multiplexing system for equalizing respective power levels of channels to overcome the signal-to-noise ratio deterioration of the transmitted signal. However, Bayart fails to anticipate

or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
